Information Disclosure Statement

The listing of references in the specification, such as on page 1, is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Specification

The disclosure is objected to because of the following informalities: The reference to claims in the specification, such as on pages 3, 4, and 5, is improper and any reference to the claims in the specification must be deleted.

Appropriate correction is required.

Claim Objections

Claims 1-7 are objected to because of the following informalities: Much of the language used in the claims is poor. Note limitations such as "having lugs protruded at" and "wings extended left and right to the center" are poor grammatically and difficult to understand. Applicant must correct the claims to read in proper idiomatic English and/or accepted claim language. Failure to do so will result in a Notice of Non-Responsive Amendment. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, the term "arranged one-sidedly" is vague and indefinite, and not understood.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Choi (U.S. Patent No. 6422666).

Claims 5-7 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Tsuru et al (U.S. Publication No. 2006/0163944).

Note figures 9 and 10, in which the extensions of the lugs on one side of the track overlap with the extensions of the lugs on the opposite side of the centerline of the track.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show other track lug arrangements.
